For Immediate Release

**One-Stop-Plastic-Parts Includes Fast Design Assistance, Multiple
Prototype Options & Production Parts—Is Diversified Plastics, Inc.
Specialty To Help Design Engineers Achieve Short
Time-To-Market Demands**

Minneapolis, Minnesota: Diversified Plastics, Inc. complete array of services sets them apart from other molding and prototype companies. Project development services include part design assistance, CAD, machining plastic prototype parts, SLA models, prototype aluminum or soft steel tools to production molds and production molding. This one-stop-plastic-parts capability provides design engineers with the best of all services to formulate fully functional and moldable components very fast.

Diversified Plastics, Inc. injection molds high precision parts for demanding tight tolerance water, air filtration, medical, and consumer applications. With 30 years experience building complicated tooling and expertise with molding the most complex resins, the company excels in difficult and challenging molding applications.

As a single source supplier, Diversified Plastics offers design assistance, in-house mold construction, precision molding, insert molding, and complex assemblies with guaranteed quality and a three decade reputation of success with the "tough jobs".

Materials include the most complex resins from engineering grade to high performance grades and experience with filled materials and foamed parts. Diversified Plastics, Inc. works with the most difficult to mold materials including PPS, PEEK, Torlon, Ultem, and similar materials.

Value-added services include product assembly, ultrasonic welding, spin welding, (removed sonic welding, it's the same as ultrasonic welding) sonic stitching, pad printing, silk screen printing, hot stamping, heat sealing, and many more.

Diversified Plastics, Inc. is equipped to provide a wide range of complex precision molding and value added services. With 15 automated molding machines ranging from 50 to 550 ton capacity and 2.3 to 40 ounce shot size.

Diversified Plastics, Inc. is a UL Recognized Molder and provides high precision molding processes that are ISO 9001:2000 certified. Closely managed documentation control allows for consistent reliability with every order.

Incorporating advanced manufacturing techniques such as integrated machine operations and cell manufacturing, Diversified Plastics, Inc. provides unparalleled quality, efficiency, and on-time delivery. Diversified Plastics welcomes medical, scientific, and consumer companies looking for challenging parts and assemblies that may be out of the ordinary.
