

NEW QUALITY DIRECTOR

Diversified Plastics is pleased to welcome our newest employee, Joseph Bourgeault. Joe started the end of July and has already made a difference in our quality plans.

Joe has had years of manufacturing experience, working his way up from Quality Assurance Technician to Process Engineer, Quality Engineer, Quality Manager, and Product Development Engineer. For the past sixteen years he worked for a manufacturer of Mylar balloons and producer/printer of flexible films. Joe is a fully trained airplane mechanic having worked for Northwest Airlines for ten years. As you can see, his work history is quite diverse.

Educationally, Joe believes in keeping his skills up-to-date. He's completed the Mini-Series in Quality at the University of St. Thomas and has even received a Black Belt Six Sigma certification. Joe's been active in the Quality community by being involved with the American Society for Quality (ASQ) for ten years.

Updating our ISO procedures is one of Joe's first projects. His plan is to revise our procedures; adding flow charts where ever possible. This is an ambitious project with our next audit due this fall.

Joe's engineering aptitude, quality skills, and management experience will enhance his contribution to our Management Team. As soon as he's settled in, he will be visiting many of our customers and vendors. In the meantime, please don't hesitate to contact him for any of your quality issues or just to say hello. Joe can be reached at (763)488-7109 or jbourgeault@divplast.com.
